SUMMARY

Full-stack engineer with experience across enterprise web systems: React/C#/.NET application development, REST API design, PostgreSQL/SQL database work, and production troubleshooting. Comfortable owning a problem from requirement gathering through solution design, implementation, and post-release support.

EXPERIENCE

Siamrajathanee Public Company Limited (Outsourced) Dec 2025 – Present
Senior Developer (Contract, SO Outsourcing)

- Building a large-scale Consent Management system for a Thai bank client, currently in the implementation phase ahead of go-live.
- Designing for a target production traffic scale of roughly 2 million records per month.

SCG Packaging Dec 2024 – Nov 2025
Full-Stack Developer (Contract via GetLinks)

- Built user management APIs and a pallet calculation feature within the existing CRM.
- Provided escalated technical support and troubleshooting for cases from the Support Team.

Metro Systems Corporation Public Company Limited 2018 – 2024
Full-Stack Developer → Senior Developer

- Started in support and digital-operations work before moving into full-stack development.
- Built enterprise web applications with React on the frontend and C#/.NET on the backend.
- Designed and implemented REST APIs, worked with SQL/PostgreSQL, and handled production troubleshooting.
- Mentored junior developers through code reviews, and worked directly with clients and cross-functional teams to gather requirements.

Chang International Circuit, Buriram 2017 – 2018
Web Master

- Managed and developed the official website, including a news system built on Yii2.
- Handled domain configuration and web hosting for the site.
